

KBC Eco Fund Prospectus

Public open-ended investment company under Belgian law with a variable number of units opting for investments complying with the conditions of Directive 2009/65/EC - UCITS

This prospectus consists of:

- Information concerning the Bevek
- Information concerning the sub-funds

The articles of association of the Bevek and the annual reports will be appended to the prospectus.

02/05/2022

In the event of discrepancies between the Dutch and the other language versions of the prospectus, the Dutch version will prevail.

Information concerning the Bevek

A. Introduction of the Bevek

Name

KBC Eco Fund (abbreviated to 'Eco Fund')

Legal form

Naamloze Vennootschap (limited liability company)

Date of incorporation

27 March 1992

Life

Unlimited

Office

Havenlaan 2, B-1080 Brussels, Belgium

Status

Public Bevek with various sub-funds that has opted for investments complying with the conditions of Directive 2009/65/EC and which, as far as its operations and investments are concerned, is governed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

In the relationship between the investors, each sub-fund will be viewed as a separate entity. Investors have a right only to the assets of and return from the sub-fund in which they have invested. The liabilities of each individual sub-fund are covered only by the assets of that sub-fund.

Klaus Vandewalle	<i>Executive Director</i>	<i>Natural person to whom the executive management of the management company has been entrusted</i>

The natural persons to whom the executive management of the management company has been entrusted may also be directors of various Beveks.

Identity of the statutory auditor of the management company or name of the certified firm of auditors and identity of the certified auditor representing it

PriceWaterhouseCoopers België, Woluwe Garden, Woluwedal 18, 1932 Sint-Stevens-Woluwe, represented by Gregory Joos, company auditor and recognized auditor.

Subscribed capital of the management company stating the paid-up element

The issued capital amounts to 35.754.192 euros.
The capital is fully paid up.

Remuneration policy

The remuneration policy of the management company's staff is based on the KBC Remuneration Policy, the general rules laid down regarding the remuneration policy for all staff of KBC group entities and specific guidelines laid down for staff who could have a material impact on the company's risk profile ('Key Identified Staff'). The KBC Remuneration Policy is updated annually.

General rules

Each staff member's salary comprises two parts: a fixed component and a variable component. The fixed component is primarily determined by the staff member's position (such as the responsibility they bear and the complexity of their duties). The variable component is dependent on various factors such as the company's results, the results of the staff member's department and the staff member's individual targets. The remuneration policy is also affected by market practices, competitiveness, risk factors, the company's and its shareholders' long-term objectives and developments within the regulatory framework.

'Key Identified Staff'

Special rules apply to 'Key Identified Staff'. The variable salary component for this group of staff is allotted in a manner that promotes appropriate risk management and cannot give rise to the taking of extreme risks.

For the updated version of the following information (such as a description of the method for calculating the remuneration and the benefits, and the identity of the persons responsible for allocating the remuneration and the benefits, including the make-up of the remuneration committee, if such a remuneration committee has been established) please refer to the website www.kbc.be/investment-legal-documents (Remuneration Policy). This information is also available free of charge at the counters of the institutions providing the financial services.

Financial service providers

The financial services providers in Belgium are:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Principal activities of the institutions providing the financial services

The Bevek has concluded a contract with the financial services providers for making payments to shareholders, redemption or repayment of shares and distributing information concerning the Bevek.

Distributor

IVESAM NV, Havenlaan 2, B-1080 Brussels

Principal activities of the distributor:

The distributor is authorised to process the requests for subscription to and redemption of shares.

Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Custodian's activities

The custodian:

- a) Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- b) Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- c) Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- d) Carries out the instructions of the management company or an investment company, provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- e) Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevek within the usual terms;
- f) Ascertains that:
 - i. The assets in custody correspond with the assets stated in the accounts of the Bevek;
 - ii. The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
 - iii. The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
 - iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
 - v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments

by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of the Bevek has been booked to cash accounts that:

1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
 - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
 - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
 - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
 - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

Custody tasks delegated by the custodian

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this prospectus. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

List of sub-custodians and sub-sub-custodians

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at www.kbc.be/investment-legal-documents.

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

Conflicts of interest

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: www.kbc.be/investment-legal-documents (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

Statutory auditor of the Bevek

Mazars Bedrijfsrevisoren CVBA, Manhattan Office Tower -Bolwerklaan 21 b8, 1210 Brussel, represented by Dirk Stragier, company auditor and recognized auditor and Nele Van Laethem, company auditor and recognized auditor

Principal activities of the statutory auditor

The statutory auditor checks whether the financial statements of the Bevek are a true and fair presentation of the financial situation of the Bevek and whether the annual report is in line with the financial statements. To determine the right working methods, the statutory auditor takes account of the existing internal audit of the Bevek in terms of drafting the financial statements and ensuring that they are true and fair.

Promoter

KBC.

Principal activities of the promoter:

The promoter promotes the Bevek and its sub-funds in the market.

Person(s) bearing the costs (in the situations referred to in articles 115, §3, para. 3, 149, 152, para. 2, 156, §1, para. 1, 157, §1, para. 3, 165, 179, para. 3 and 180, para. 3 of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Regulation 2009/65/EC)

KBC Asset Management N.V. and/or one or more companies that are members of the KBC Group and/or the person(s) referred to under "Financial service providers".

C. Corporate information

Capital

The capital of the Bevek is at all times equal to the net asset value. The capital may not be less than 1 200 000 euros.

Balance sheet date

31 August.

Rules for the valuation of the assets

See article 9 of the articles of association of the Bevek.

Rules concerning the allocation of the net income

See article 17 of the articles of association of the Bevek.

Annual general meeting of shareholders

The annual general meeting is held on the second-last banking day of the month of November at 11 am at the Office of the Bevek or at any other place in Belgium indicated in the convening notice.

Voting rights of the shareholders

In accordance with the articles of association and the Code of Companies and associations, the shareholder has a vote at the General Meeting of shareholders in proportion to the size of their shares.

Suspension of the redemption of shares

See article 9.4 of the articles of association of the Bevek.

Liquidation of the Bevek or a sub-fund

See article 19 of the articles of association of the Bevek and the applicable provisions of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Regulation 2009/65/EC.

D. Techniques for efficient portfolio management

Securities Financing Transactions (SFTs)

General

Each sub-fund may lend financial instruments within the limits set by law and regulations.

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty in exchange for financial collateral and subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request. The counterparty pays a fee for this to the sub-fund.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

The sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.

General information on the SFTs used

Type of SFT	Types of asset that the SFT can involve	Maximum percentage of the assets under management that can be involved in the SFT	Anticipated percentage of the assets under management that will be involved in the SFT
Lending financial instruments	Only shares and bonds will be lent	When lending financial instruments a maximum of 30% of the assets under management will be involved.	Depending on market conditions 0–30% of the assets under management will be involved in the lending of financial instruments

Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

Legal status	Minimum rating	Country of origin
<p>The counterparty must belong to one of the following categories:</p> <ul style="list-style-type: none"> a) A credit institution; or b) An investment firm; or c) A settlement or clearing institution; or d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate. 	<p>Only counterparties rated as investment grade may be considered.</p> <p>An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies:</p> <ul style="list-style-type: none"> - Moody's (Moody's Investors Service); - S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en - Fitch (Fitch Ratings). <p>If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration.</p>	<p>All geographical regions may be considered when selecting counterparties.</p>

The relationship with the counterparty or counterparties is governed by standard international agreements.

Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the office of the credit institution is situated within a member state of the EEA, or if the office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as defined in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

Policy on the diversification of collateral and the correlation policy

A sub-fund is not permitted to accept financial collateral issued by the party offering them.

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

Holding of the financial collateral

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Beveke's assets, as stated under 'B. Service providers to the Beveke'.

Influence of SFTs on a sub-fund's risk profile

This lending does not affect a sub-fund's risk profile since:

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.

- A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other or other specific types of securities with a low risk, such as government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.
- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

Distribution policy for returns on the utilised SFTs

By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) **as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received** and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.

More information is provided on the terms and conditions governing securities lending in the annual or half-yearly report for the Bevek.

General strategy for hedging the exchange rate risk

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale and/or the purchase of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

E. Social, ethical and environmental aspects

The investment policy takes into account certain social, ethical and environmental aspects against which issuers are being assessed. Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus and nuclear weapons;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of socially responsible investments. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional funds and funds investing in socially responsible investments*. These exclusion criteria can be modified at any time by the management company.

For some sub-funds, additional criteria relating to Socially Responsible Investing ("SRI") may apply. These are further specified in 'Information concerning the sub-fund – 2. Investment information – Selected strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for funds investing in socially responsible investments*.

For sub-funds that are passively managed and therefore replicate the composition of a financial index, the following applies:

Investments may not be made in financial instruments issued by manufacturers of controversial weapon systems that are prohibited by national law. These weapon systems include: cluster bombs and sub-munitions, anti-personnel mines (including Claymore mines), weapons containing depleted uranium (More information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional funds and funds investing in socially responsible investments*).

Integration of sustainability risk into the investment policy:

In the investment policy, the management company shall take into account the sustainability risk as defined in prospectus under title "F. Information on the risk profile of the UCITS" as follows:

- I. by defining an exclusion policy (the "Exclusion Criteria") applicable to all funds and Sicavs. (Further information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional funds and socially responsible Investment funds*); and
- II. additional criteria relating to Socially Responsible Investing ("SRI") may apply for certain sub-funds. If applicable these additional criteria are specified under title '2. Investment information - Selected Strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for socially responsible funds*.

In its investment policy, the management company constantly assesses the underlying investments at issuer level, but also (if relevant) at the level of the asset allocation and the regional or sectoral allocation. In these regular assessments, the sustainability risk is considered as one of the various elements that can influence the return. The SRI research team assigns an ESG risk rating to the majority of companies included in the best-known benchmarks and to a selection of small and medium-sized companies, based on input from an ESG data provider, where ESG stands for "Environmental, Social and Governance". The ESG risk ratings are shared internally with portfolio managers and strategists so that they can use them as a factor in the investment decision-making process. Only sub-fund that follow the Best-In-Class methodology have a binding rule: they only invest in companies with the lowest ESG risk rating in their sub-sector. The threshold varies. Relatively more companies are accepted from sub-sectors with a low ESG risk rating than from sub-sectors with a high ESG risk rating.

F. Information on the risk profile of the UCITS

Investors should take note of the general information below, the individual risks of a sub-fund which are listed under the "Information regarding the sub-fund - 3. Risk profile", as well as the "Risk and reward profile" in the key investor information document.

The value of a share can decrease or increase and the investor may not get back the amount invested.

The UCITS risk profile is based on a recommendation by the Belgian Asset Managers Association, which is available at www.beama.be.

List of risks

The information below is a general overview of the potential risks that the investor could incur. The assessment of the risks in each sub-fund can be accessed under the 'Information regarding the sub-fund - 3. Risk profile'. There, a list of risks for the relevant sub-fund may be consulted, with an indication of the risk assessment, and a brief justification for the risk assessment.

Market risk

The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio. In an equity fund, for instance, this is the risk that the equity market in question will go down and, in a bond fund, the risk that the bond market in question will fall. The higher the volatility of the market in which the UCITS invests, the greater the risk. Such markets are subject to greater fluctuations in return.

Credit risk

The risk that an issuer or a counterparty will default and fail to meet its obligations towards a sub-fund. This risk exists to the extent that a sub-fund invests in debt instruments. Debtor quality also affects the credit risk (e.g., an investment in a debtor with a rating, such as 'investment grade', will pose a lower credit risk than an investment in a debtor with a low rating, such as 'speculative grade'). Changes in the quality of the debtor can have an impact on the credit risk.

Settlement risk

The risk that settlement via a payment system will not take place as expected because payment or delivery by a counterparty fails to take place or is not in accordance with the initial conditions. This risk exists to the extent that the UCITS invests in regions where the financial markets are not yet well developed. This risk is limited in regions where the financial markets are well developed.

Liquidity risk

The risk that a position cannot be liquidated in a timely manner at a reasonable price. This means that the UCITS can only liquidate its assets at a less favourable price or after a certain period. The risk exists if the UCITS invests in instruments for which there is no market or a market with only limited liquidity; for example, in the case of unlisted investments and direct real estate investments. OTC derivatives may also lack liquidity.

Exchange or currency risk

The risk that the value of an investment will be affected by changes in exchange rates. This risk exists only to the extent that the UCITS invests in assets that are denominated in a currency that develops differently from the reference currency of the sub-fund. For instance, a sub-fund denominated in USD will not be exposed to any exchange risk when investing in bonds or equities denominated in USD, but it will be exposed to an exchange risk when investing in bonds or equities denominated in EUR.

The assessment of the exchange risk does not take account of the volatility of all currencies in which the assets in portfolio are denominated vis-à-vis the reference currency of the UCITS.

Custody risk

The risk of loss of assets held in custody as a result of insolvency, negligence or fraud on the part of the custodian or a sub-custodian.

Concentration risk

The risk relating to a large concentration of investments in specific assets or in specific markets. This means that the performance of those assets or markets will have a substantial impact on the value of the UCITS portfolio. The greater the diversification of the UCITS portfolio, the smaller the concentration risk. This risk will, for example, also be higher in more specialised markets (e.g., a specific region, sector or theme) than in widely diversified markets (e.g., a worldwide allocation).

Performance risk

The risk to return, including the fact that the risk may vary depending on the choices made by each undertaking for collective investment, as well as the existence or absence of, or restrictions upon, any third-party security. The risk depends in part on the market risk and on how active the management of the manager is.

Capital risk

The risks to capital, including the potential risk of erosion due to the redemption of shares and the distribution of profit in excess of the investment return. This risk can be limited by loss-mitigation, capital-protection or capital-guarantee techniques.

Flexibility risk

Inflexibility both within the product itself, including the risk of premature redemption, and constraints on switching to other providers. This risk can mean that the UCITS is unable to take the desired actions at certain times. It can be higher in the case of UCITS or investments subject to restrictive laws or regulations.

Inflation risk

This risk is dependent on inflation. It applies, for example, to bonds with a long term to maturity and a fixed income.

Environmental factors

Uncertainty concerning the changeability of environmental factors (such as the tax regime or amendments to laws or regulations) that could affect how the UCITS operates.

Sustainability risk

Sustainability risk is the risk that the value of the investment will be adversely affected by environmental, social or governance events or conditions.

Environmental risk is the risk that the value of the investment will be adversely affected by environmental events or conditions, including those resulting from climate change and other environmental degradation.

Social risk is the risk that the value of the investment will be adversely affected by social events or conditions.

Governance risk is the risk that the value of the investment will be adversely affected by events or circumstances resulting from insufficient corporate governance.

The nature of these risks varies over time:

- I. In the short term, sustainability risk is usually dependent on a particular event. Such risks usually only affect the value of the investment when the event occurs. Examples of these events are an incident (resulting in a lawsuit to compensate for e.g. environmental damage), lawsuits and fines (e.g. for not respecting social legislation), scandals (e.g. when a company gets bad publicity because human rights are not respected within the production chain or because the products do not meet the promised ESG standards, where ESG stands for "Environmental, Social and Governance"). These types of sustainability risks are rated higher when an issuer is less stringent on ESG standards; and
- II. Long-term sustainability risk refers to risks that may develop over the long term, such as: business activities that may come under pressure due to climate change (e.g. parts of the automotive industry); changing product preferences of customers (e.g. preference for more sustainable products); difficulties in recruitment; rising costs (e.g. insurance companies facing claims as a result of changing weather conditions). As this risk develops over the long term, companies may seek to mitigate it, for example, by changing their product offerings, improving their supply chain, etc. However, the ability to adapt is not the same for all types of business activities, so some activities are more exposed to sustainability risk than others (e.g. the oil sector). This is why the sustainability risk also depends on the specific investment policy of a sub-fund.

Unless otherwise specified in the "Information concerning the sub-fund - 3. Risk profile – Environmental factors", the sustainability risk is 'low'.

Synthetic risk and reward indicator

In accordance with Commission Regulation (EU) No. 583/2010, a synthetic risk and reward indicator has been calculated. This indicator provides a quantitative measure of a sub-fund's potential return and the risk involved, calculated in the currency in which a sub-fund is denominated. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The synthetic risk and reward indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'Risk and reward profile' heading in the 'Key Investor Information' document.

G. Fees and charges regarding the Bevek

A detailed overview of the fees and charges of each sub-fund can be accessed in the "Information regarding the sub-fund - 5. Types of shares and fees and charges".

Recurrent fees and charges

Recurrent fees and charges paid by the Bevek	
Fees paid to directors, insofar as the General Meeting has approved said fees.	250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed.

Recurrent fees and charges paid by the sub-fund	
Fee paid to the statutory auditor of the Beveik	Fee of the statutory auditor: 4 875.00 EUR/year (excluding VAT BTW) and 864 EUR/year (excluding VAT) for non-structured sub-funds 1 598.00 EUR/year (excluding VAT) for structured sub-funds These amounts can be indexed on an annual basis in accordance with the decision of the General Meeting.

Non-recurrent fees and charges borne by the investor

If, at a certain time, the Management Company detects exceptionally high net entries in or exits from a sub-fund, it may decide to impose an additional charge (anti-dilution levy) on the entering or exiting investors concerned, intended for the sub-fund and aimed at neutralising the negative impact on the net asset value caused by investors' entries or exits.

This anti-dilution levy will only be charged in very exceptional situations where, due to exceptional market conditions, the transaction charges resulting from the entries and exits of investors are so high that they would have too great a negative impact on the net asset value (and therefore on existing investors in that sub-fund). At that time, the amount of this anti-dilution levy will be determined by the Management Company in function of the transaction charges.

This anti-dilution levy can be applied in the following sub-funds: Alternative Energy, Climate Change, CSOB Water, Impact Investing, Water, World.

Ongoing charges

The key investor information sets out the ongoing charges, as calculated in accordance with the provisions of Commission Regulation (EC) No. 583/2010 of 1 July 2010.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown in a single figure that represents all annual charges and other payments taken from the assets over the defined period and for a sub-fund and that is based on the figures for the preceding year. This figure is expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class.

The following are not included in the charges shown: entry and exit charges, performance fees, transaction costs paid when buying or selling assets, interest paid, payments made with a view to providing collateral in the context of derivative financial instruments, or commissions relating to Commission Sharing Agreements or similar fees received by the Management Company or any person associated with it.

Portfolio turnover rate

An important indicator for estimating the transaction costs to be paid by a sub-fund is the portfolio turnover rate. This rate shows the frequency with which the composition of the assets changes during a year as a result of transactions not dependent on the subscription for or redemption of shares. Active asset management may result in high turnover rates. The portfolio turnover rate for the preceding year is given in the annual report.

Existence of Commission Sharing Agreements

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed.

More information on Commission Sharing Agreements is available in the annual report.

Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In principle, the percentage share amounts to between 35% and 70%. However, in a small number of cases, the distributor's fee is less than 35%. Investors may, on request, obtain more information on these cases.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

H. Tax treatment

Of the Bevek

Annual tax on undertakings for collective investment

The following tax is due payable by the Bevek :

Annual tax on undertakings for collective investment	0.0925% (0.01% for institutional share classes)	of the net amounts outstanding in Belgium on 31 December of the preceding year. The amounts already included in the tax base of the underlying undertakings for collective investment are not included in the tax base.
--	---	---

Furthermore tax withheld at the source on foreign income is recovered by the Bevek (in accordance with double taxation conventions).

Of the investor

The following tax-related information is of a general character and is not intended to cover all aspects of an investment in a UCITS. In certain cases entirely different rules might even apply. Moreover, both tax law and the interpretation of it can change. Investors who wish to have more information about the tax implications – in both Belgium and abroad – of acquiring, holding and transferring shares should seek the advice of their usual financial and tax advisers.

Withholding tax

This tax is charged at 30% as of 1.1.2017.

For investors subject to personal income tax or tax on legal entities

Tax on dividends (distribution shares)

For investors subject to personal income tax or to tax on legal entities and who have received this income through the normal management of their assets, the withholding tax is automatically the final tax on this income.

Tax on debt claim returns (Article 19bis of the 1992 Income Tax Code)

If the percentage of debt claims is more than 25% (for shares acquired as of 1 January 2018, this percentage is lowered to 10%), both the capitalisation and distribution shares of the UCITS will, on redemption or in the event of the full or partial distribution of the equity capital or in the event of transfer for a consideration, fall within the scope of Article 19bis of the 1992 Income Tax Code. On the basis of that article, tax will be levied on the debt claim returns included in the redemption, transfer or repayment price according to the period in which the investor held the shares.

Article 19bis of the 1992 Income Tax Code applies only to shareholders who are subject to Belgian personal income tax and to common mutual funds.

For investors subject to corporation tax

The withholding tax is not the final tax on this income. The income (dividends and capital gains) will be subject to Belgian corporation tax.

Stock market tax

For non-institutional share classes*:

	Subscription	Redemption	Switching between sub-funds
Stock market tax	-	CAP (capitalisation shares): At maturity and on the Early Exercise Date (if applicable): 0% Else: 1.32% (max. 4 000 euros) DIS (distribution shares): 0%	CAP -> CAP/DIS : 1.32% (max. 4 000 EUR) DIS-> CAP/DIS : 0%

* No stock market tax is applicable to institutional share classes.

Obligatory automatic exchange of information for tax purposes

Under Belgian law, the Bevek is obliged to collect certain information on its investors and to automatically disclose information to the Belgian tax authorities regarding investors with tax obligations in the US or with place of residence for tax purposes outside Belgium. The Belgian tax authorities may only use the information received from the Bevek to pass them on to foreign competent authorities for tax purposes. The disclosed information will, in addition to the details identifying investors, such as their names, addresses and places and dates of birth, include financial details of the investment in the Bevek over a certain reference period.

I. Additional information

Information sources

The prospectus, the key investor information document, the articles of association, the annual and half-yearly reports and, where relevant, full information on the other sub-funds may be obtained free of charge from the financial services providers before or after subscription to the shares.

The ongoing charges and the portfolio turnover rate for preceding periods can be obtained from the office of the Bevek at Havenlaan 2, B-1080 Brussels, Belgium.

The following documents and information are available at www.kbc.be/kiid: key investor information, the prospectus, the most recently published annual and half-yearly reports.

The past performance of each sub-fund is provided in the annual report.

The Board of Directors of the Bevek is responsible for the content of the prospectus and the key investor information. To the best of the Board of Directors of the Bevek's knowledge, the information contained in the prospectus and the key investor information is true and correct and nothing has been omitted that would alter the import of either the prospectus or the key investor information.

In accordance with article 10.3 of the articles of association, and subject to legal requirements, the Board of Directors is empowered to set the investment policy for each sub-fund. The Board of Directors may change the investment policy set out in the prospectus and in the key investor information document.

Publication of the net asset value

The net asset value is available from the branches of the institutions providing the financial services. Following calculation, it is published on the website of Beama (www.beama.be) and/or on the KBC Asset Management NV website (www.kbc.be/investing) and/or on the websites of the institutions providing the financial services.

Contact point where additional information may be obtained if needed

Product and Knowledge Management Department- APC
KBC Asset Management NV
Havenlaan 2

Belgium
Tel. KBC Live 078 152 153 (N) – 078 152 154 (F) - 078 353 137 (E) - 078 353 138 (D)

J. Prohibition of offer or sale

This UCITS and the sub-funds of the UCITS may not be publicly offered or sold in countries where they have not been registered with the local authorities.

The UCITS and the sub-funds of the UCITS are not registered nor will they be registered based on the United States Securities Act of 1933, as amended from time to time. It is forbidden to offer, sell, transfer or deliver shares, directly or indirectly, in the United States of America or one of its territories or possessions or any area that is subject to its jurisdiction or to a US person, as defined in the aforementioned Securities Act. The UCITS and the sub-funds of the UCITS are not registered based on the United States Investment Company Act of 1940, as amended from time to time.

K. Competent authority

Belgian Financial Services and Markets Authority (FSMA)
Congresstraat 12-14
1000 Brussels

The key investor information and the prospectus will be published after approval by the FSMA. This approval does not involve any assessment of the opportuneness or quality of the offer or of the circumstances of the individual making it.

The official text of the articles of association has been filed with the registry of the Corporate Court.

L. Use of Benchmarks

Benchmarks

The information on certain sub-funds of the Bevek included in this prospectus may refer to the use of benchmarks. In keeping with the individual sub-fund's investment policy, a benchmark is understood to be an index or a combination of different indices that serves as a reference point for measuring the performance and composition of the sub-fund's portfolio.

Unless expressly stated otherwise in the investment policy, the sub-fund referring to a benchmark is actively managed, does not passively track the composition of the benchmark index and may invest in securities not included in that index. More information on how the benchmark is used for managing sub-funds can be found in the information relating to the Bevek's sub-funds included in this prospectus.

Investors should be aware that the performance of the sub-fund may differ from the performance of the benchmark. This difference is measured by means of a tracking error, which indicates the extent of volatility between those performances. The long-term expected tracking error is given in the table below. Investors should be aware that market conditions may cause the actual tracking error to differ from the long-term expected tracking error.

Inclusion in the European Securities and Markets Authority's register

Pursuant to Regulation (EU) 2016/1011 of the European Parliament and of the Council (the 'Benchmark Regulation'), the Bevek is required to disclose information on the inclusion of the benchmarks' administrator in the register of approved administrators and benchmarks as established by the European Markets and Securities Authority (the 'ESMA Register').

The Bevek will monitor the inclusion in the ESMA Register of entities acting as administrator(s) of benchmarks used by sub-funds of the Bevek, and this by no later than the date on which the obligation for inclusion in this register takes effect for these entities. The Bevek will then amend the prospectus accordingly.

At present, reference is made to the following benchmarks:

Sub-fund	Expected tracking error	Benchmark	Administrator	Included in ESMA-Register
World	3,00%	MSCI World-Net Return index	MSCI	No

Contingency plan

The Management Company of the Bevek has drafted a contingency plan on the actions to be taken in case a benchmark used by one or more of the UCI's sub-funds materially changes or ceases to be provided.

Examples of situations in which a benchmark materially changes are, but not limited to:

- The benchmark or its administrator is delisted from ESMA's register;
- The geographical, economical or sectorial scope of the benchmark significantly changes; and
- A new benchmark becomes available which is regarded as the market standard for investors in the particular market and/or would be regarded as of greater benefit to the fund's investors.

Examples of situations where a benchmark ceases to be provided are, but not limited to:

- The benchmark ceases to exist;
- The benchmark administrator withdraws the license to use the benchmark; and
- A new benchmark supersedes the existing benchmark.

In case a benchmark used by one or more sub-funds of the UCITS, materially changes or ceases to be provided, a suitable replacing benchmark will be sought after.

Consideration which will be taken into account in the course of selecting a replacement benchmark are, but not limited to:

- The geographical, economical or sectorial scope of the new benchmark is in line with the existing benchmark;;
- Preference will be given to benchmarks that are regarded as the market standard for investors in the particular market; and
- Preference will be given to administrators with an existing license with KBC AM, should this result in lower costs.

If no replacement benchmark can be found, an alternative solution can be used such as amending the sub-fund's investment policy or proposing the fund's liquidation.

The principles stated above and in the contingency plan are without prejudice to the provisions stipulated in the Information concerning the sub-funds.

Information concerning the sub-fund Alternative Energy

1. Basic details

Name

Alternative Energy

Date of incorporation

27 September 2000

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Selected strategy

The total assets of the sub-fund are invested, to the maximum extent possible, in shares of companies operating in the alternative energy sector in a socially responsible way. These companies have to realize a substantial proportion of their turnover in this sector.

The sub-fund invests in socially responsible assets. Socially Responsible Investing (SRI), has a positive impact on society, the environment and the world we live in. It is aligned with today's social and economic needs, without jeopardising the needs of future generations. The sub-fund promotes a combination of environmental and social characteristics, namely providing access to and improving the efficiency of alternative energy, but is not a sustainable investment within the meaning of Article 2(17) of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector. However, the concrete contribution to these characteristics is not measured by indicators. The companies in which it invests must follow good governance practices.

Specialised researchers of KBC Asset Management NV compile a universe of socially responsible companies. They are assisted by an advisory board (i.e. the 'SRI Advisory Board') comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the methodology and activities of the specialist researchers of KBC Asset Management NV. The secretariat of the advisory board is provided by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with a data supplier with expertise in SRI that provides data to the specialised researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The fund manager then strives to invest as much as possible in assets that form part of this universe. In order to create this socially responsible universe, the companies are subjected to a negative and positive screening procedure.

Negative screening

Negative screening entails specific criteria that exclude companies in advance from the socially responsible universe.

On top of the exclusion criteria set out under 'Social, ethical and environmental aspects', the companies are assessed against additional SRI exclusion criteria which are available at www.kbc.be/investment-legal-documents > Exclusion policies for socially responsible investment funds.

The most important exclusion criteria relate on the one hand to controversial activities (tobacco, gambling, weapons, fur and speciality leather and adult entertainment). Companies involved in such controversial activities are excluded. On the other hand, the screening for controversies ensures that companies who seriously violate the basic principles

in terms of the environment, social aspects or good governance are excluded. This list is not exhaustive and can be adapted under the supervision of the Advisory Board.

Positive screening

Positive screening entails creating a universe of companies that operate in the alternative energy sector in a socially responsible manner. This includes, for example, the following business activities: companies active in the development of solar energy, wind energy and biofuels. Companies that focus at least 50% of their activities on this objective or that are market leaders in the relevant field(s) are eligible for the universe provided that these activities represent a significant part of their turnover.

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- developments as a result of which a company can no longer be regarded as socially responsible after purchase on the basis of the above criteria;
- corporate events, such as a merger of one company with another, where the merged company can no longer be considered a socially responsible company on the basis of the above criteria;
- incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets that do not have a socially responsible nature;
- a planned update of the socially responsible universe in which assets are no longer labelled as socially responsible but in which the fund manager chooses not to sell them immediately in the interest of the customer due to transaction charges.

In these cases, the fund manager will replace the assets concerned with socially responsible assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets which are not of a socially responsible nature, to the extent that no workable and comparable socially responsible alternative is available on the market for these derivatives. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a socially responsible nature.

The fund is actively managed without referring to any benchmark.

The socially responsible character is guaranteed by the aforementioned SRI screening.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in a theme which may include companies with a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies that operate in a socially responsible way within the alternative energy theme.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be/riskprofile.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Information concerning the sub-fund Climate Change

1. Basic details

Name

Climate Change

Date of incorporation

29 December 2006

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Selected strategy

The total assets of the sub-fund are invested, to the maximum extent possible, in shares of companies operating in combating climate change and/or focus on reducing greenhouse gas emissions in a socially responsible way. These companies have to realize a substantial proportion of their turnover in this sector.

The sub-fund invests in socially responsible assets. Socially Responsible Investing (SRI), has a positive impact on society, the environment and the world we live in. It is aligned with today's social and economic needs, without jeopardising the needs of future generations. The sub-fund promotes a combination of environmental and social characteristics, namely climate change mitigation, but is not a sustainable investment within the meaning of Article 2(17) of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector. However, the concrete contribution to these characteristics is not measured by indicators. The companies in which it invests must follow good governance practices.

Specialised researchers of KBC Asset Management NV compile a universe of socially responsible companies. They are assisted by an advisory board (i.e. the 'SRI Advisory Board') comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the methodology and activities of the specialist researchers of KBC Asset Management NV. The secretariat of the advisory board is provided by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with a data supplier with expertise in SRI that provides data to the specialised researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The fund manager then strives to invest as much as possible in assets that form part of this universe. In order to create this socially responsible universe, the companies are subjected to a negative and positive screening procedure.

Negative screening

Negative screening entails specific criteria that exclude companies in advance from the socially responsible universe.

On top of the exclusion criteria set out under 'Social, ethical and environmental aspects', the companies are assessed against additional SRI exclusion criteria which are available at www.kbc.be/investment-legal-documents > Exclusion policies for socially responsible investment funds.

The most important exclusion criteria relate on the one hand to controversial activities (tobacco, gambling, weapons, fur and speciality leather and adult entertainment). Companies involved in such controversial activities are excluded. On the other hand, the screening for controversies ensures that companies who seriously violate the basic principles in terms of the environment, social aspects or good governance are excluded. This list is not exhaustive and can be

adapted under the supervision of the Advisory Board.

Positive screening

Positive screening entails creating a universe of companies that operate in a socially responsible manner in combating climate change.

This includes, for example, the following business activities: companies active in the field of water, alternative energy, energy saving, recycling and waste processing. Companies that focus at least 50% of their activities on this objective or that are market leaders in the relevant field(s) are eligible for the universe provided that these activities represent a significant part of their turnover.

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- developments as a result of which a company can no longer be regarded as socially responsible after purchase on the basis of the above criteria;
- corporate events, such as a merger of one company with another, where the merged company can no longer be considered a socially responsible company on the basis of the above criteria;
- incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets that do not have a socially responsible nature;
- a planned update of the socially responsible universe in which assets are no longer labelled as socially responsible but in which the fund manager chooses not to sell them immediately in the interest of the customer due to transaction charges.

In these cases, the fund manager will replace the assets concerned with socially responsible assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets which are not of a socially responsible nature, to the extent that no workable and comparable socially responsible alternative is available on the market for these derivatives. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a socially responsible nature.

The fund is actively managed without referring to any benchmark.

The socially responsible character is guaranteed by the aforementioned SRI screening.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in a theme which may include companies with a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies that operate in a socially responsible way in the fight against climate change and/or focus on reducing greenhouse gas emissions.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	moderate	there is a dependency on the policies on climate change.

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be/riskprofile.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

1. Basic details

Name

CSOB Water

Date of incorporation

11 May 2007

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Selected strategy

The total assets of the sub-fund are invested, to the maximum extent possible, in shares of companies operating in the water sector in a socially responsible way. These companies have to realize a substantial proportion of their turnover in this sector.

The sub-fund invests in socially responsible assets. Socially Responsible Investing (SRI), has a positive impact on society, the environment and the world we live in. It is aligned with today's social and economic needs, without jeopardising the needs of future generations. The sub-fund promotes a combination of environmental and social characteristics, namely providing access to and improving the efficiency of clean water facilities, but is not a sustainable investment within the meaning of Article 2(17) of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector. However, the concrete contribution to these characteristics is not measured by indicators. The companies in which it invests must follow good governance practices.

Specialised researchers of KBC Asset Management NV compile a universe of socially responsible companies. They are assisted by an advisory board (i.e. the 'SRI Advisory Board') comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the methodology and activities of the specialist researchers of KBC Asset Management NV. The secretariat of the advisory board is provided by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with a data supplier with expertise in SRI that provides data to the specialised researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The fund manager then strives to invest as much as possible in assets that form part of this universe. In order to create this socially responsible universe, the companies are subjected to a negative and positive screening procedure.

Negative screening

Negative screening entails specific criteria that exclude companies in advance from the socially responsible universe.

On top of the exclusion criteria set out under 'Social, ethical and environmental aspects', the companies are assessed against additional SRI exclusion criteria which are available at www.kbc.be/investment-legal-documents > Exclusion policies for socially responsible investment funds.

The most important exclusion criteria relate on the one hand to controversial activities (tobacco, gambling, weapons, fur and speciality leather and adult entertainment). Companies involved in such controversial activities are excluded. On the other hand, the screening for controversies ensures that companies who seriously violate the basic principles

in terms of the environment, social aspects or good governance are excluded. This list is not exhaustive and can be adapted under the supervision of the Advisory Board.

Positive screening

Positive screening entails creating a universe of companies that operate in the water sector in a socially responsible manner. This includes, for example, the following business activities: companies active in the field of water and wastewater services, water purification technology and consultancies in the field of environmental management. Companies that focus at least 50% of their activities on this objective or that are market leaders in the relevant field(s) are eligible for the universe provided that these activities represent a significant part of their turnover.

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- developments as a result of which a company can no longer be regarded as socially responsible after purchase on the basis of the above criteria;
- corporate events, such as a merger of one company with another, where the merged company can no longer be considered a socially responsible company on the basis of the above criteria;
- incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets that do not have a socially responsible nature;
- a planned update of the socially responsible universe in which assets are no longer labelled as socially responsible but in which the fund manager chooses not to sell them immediately in the interest of the customer due to transaction charges.

In these cases, the fund manager will replace the assets concerned with socially responsible assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets which are not of a socially responsible nature, to the extent that no workable and comparable socially responsible alternative is available on the market for these derivatives. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a socially responsible nature.

The fund is actively managed without referring to any benchmark.

The socially responsible character is guaranteed by the aforementioned SRI screening.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in a theme which may include companies with a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	low	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies that operate in a socially responsible way within the water theme.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be/riskprofile.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Fee paid to the independent directors	see the 'Information concerning the Bevek - G. Fees and charges regarding the Bevek'
---------------------------------------	--

One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share

	<i>Subscription</i>	<i>Redemption</i>	<i>Switching between subfunds</i>
Trading fee	During the initial subscription period: 3.00% After the initial subscription period: 3.00%	-	A trading commission that is equal to the one applicable when buying into the new sub-fund
Administrative charges	-	-	-
Amount to cover the costs of the purchase/sale of assets	-	-	The appropriate amount covering these costs for the sub-funds concerned
Amount to discourage sales within one month of purchase	-	Max 5.00% for the sub-fund	Max 5.00% for the sub-fund
Stock market tax	see the 'Information concerning the Bevek - H. Tax treatment'		

Recurrent fees and charges paid by the sub-fund unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share

Fee for managing the investment portfolio	Max 2.00%	per year calculated on the basis of the average total net assets of the sub-fund. For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to max. 1.70% a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	-	-
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	see the 'Information concerning the Bevek - G. Fees and charges regarding the Bevek' for this non-structured sub-fund	
Annual tax	see the 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Information concerning the sub-fund Impact Investing

1. Basic details

Name

Impact Investing

Date of incorporation

30 November 2000

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Selected strategy

The investment philosophy of the sub-fund is based on the concept of impact investing (mission-related investments). The sustainable investment objective is to contribute to sustainable development.

To this end, the assets are invested to the maximum extent possible, in equities of companies throughout the world which seek not only to achieve a financial return, but also to make a positive contribution, through their products and/or services, to sustainable themes and thus have an impact on society and the environment.

Specialised researchers of KBC Asset Management NV compile a universe of companies that contribute to sustainable development.

They are assisted by an advisory board (i.e. the 'SRI Advisory Board', where SRI stands for 'Socially Responsible Investing') comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the methodology and activities of the specialist researchers of KBC Asset Management NV. The secretariat of the advisory board is provided by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with a data supplier with expertise in sustainability that provides data to the specialised researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The fund manager then strives to invest as much as possible in assets that form part of this universe. In order to create this universe, the companies are subjected to a negative and positive screening procedure.

Negative screening

Negative screening entails specific criteria that exclude companies in advance from the universe.

On top of the exclusion criteria set out under 'Social, ethical and environmental aspects', the companies are assessed against additional SRI exclusion criteria which are available at www.kbc.be/investment-legal-documents > Exclusion policies for socially responsible investment funds.

The most important exclusion criteria relate on the one hand to controversial activities (tobacco, gambling, weapons, fur and speciality leather and adult entertainment). Companies involved in such controversial activities are excluded. On the other hand, the screening for controversies ensures that companies who seriously violate the basic principles in terms of the environment, social aspects or good governance are excluded. This list is not exhaustive and can be adapted under the supervision of the Advisory Board.

Positive screening

Specialised researchers from KBC Asset Management NV determine, in consultation with the SRI Advisory Board, which sustainability themes can be addressed in the sub-fund. Examples of such themes are renewable energy,

sustainable mobility, healthy food, access to education and recycling. Companies whose products and/or services have a positive influence on such a theme will be presented to the Advisory Board. If evaluated positively, these companies have a chance of being included. The influence that a company exerts through its core activity on the chosen theme is measured regularly (for example, by the number of installed hydrogen installations to stimulate renewable energy, the number of homes for social housing projects to stimulate affordable housing and the use of polymers from waste streams to stimulate recycling). If it is deemed that insufficient progress is being made or that the company is no longer relevant to the theme, this company will be excluded from the authorised universe and therefore from the portfolio of the sub-fund.

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- developments as a result of which a company can no longer contribute to sustainable development after purchase on the basis of the above criteria;
- corporate events, such as a merger of one company with another, where the merged company can no longer be considered to contribute to sustainable development on the basis of the above criteria;
- incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets that do not contribute to sustainable development;
- a planned update of the universe in which assets no longer contribute to sustainable development but in which the fund manager chooses not to sell them immediately in the interest of the customer due to transaction charges.

In these cases, the fund manager will replace the assets that contribute to sustainable development in assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that do not contribute to sustainable development, to the extent that no workable and comparable sustainable development alternative is available on the market for these derivatives. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers who contribute to sustainable development.

The fund is actively managed without referring to any benchmark.

The aforementioned screening process provides a structured methodology for achieving the sub-fund's sustainable investment objective.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there is a relatively large number of shares of a company compared to the number of shares that are daily traded on average, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	For the share class Classic Shares : high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
		For the share class Institutional F Shares LU : high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
		For the share class Classic Shares K&H HUF : high	since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	

Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration in shares of companies that are expected to contribute the most to sustainable development via their core business and which have significant exposure on one or more of the “sustainability themes” or “impact themes” that target social and/or environmental problems.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	low	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be/riskprofile.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share

	<i>Subscription</i>	<i>Redemption</i>	<i>Switching between subfunds</i>
Trading fee	-	-	A trading commission that is equal to the one applicable when buying into the new sub-fund
Administrative charges	-	-	-
Amount to cover the costs of the purchase/sale of assets	-	-	The appropriate amount covering these costs for the sub-funds concerned
Amount to discourage sales within one month of purchase	-		
Stock market tax	see the 'Information concerning the Bevek - H. Tax treatment'		

Recurrent fees and charges paid by the sub-fund unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund. For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to max. 1.70% a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	-	-
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	see the 'Information concerning the Bevek - G. Fees and charges regarding the Bevek' for this non-structured sub-fund	
Annual tax	see the 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Information concerning the sub-fund Water

1. Basic details

Name

Water

Date of incorporation

23 October 2000

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Selected strategy

The total assets of the sub-fund are invested, to the maximum extent possible, in shares of companies operating in the water sector in a socially responsible way. These companies have to realize a substantial proportion of their turnover in this sector.

The sub-fund invests in socially responsible assets. Socially Responsible Investing (SRI), has a positive impact on society, the environment and the world we live in. It is aligned with today's social and economic needs, without jeopardising the needs of future generations. The sub-fund promotes a combination of environmental and social characteristics, namely providing access to and improving the efficiency of clean water facilities, but is not a sustainable investment within the meaning of Article 2(17) of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector. However, the concrete contribution to these characteristics is not measured by indicators. The companies in which it invests must follow good governance practices.

Specialised researchers of KBC Asset Management NV compile a universe of socially responsible companies. They are assisted by an advisory board (i.e. the 'SRI Advisory Board') comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the methodology and activities of the specialist researchers of KBC Asset Management NV. The secretariat of the advisory board is provided by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with a data supplier with expertise in SRI that provides data to the specialised researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The fund manager then strives to invest as much as possible in assets that form part of this universe. In order to create this socially responsible universe, the companies are subjected to a negative and positive screening procedure.

Negative screening

Negative screening entails specific criteria that exclude companies in advance from the socially responsible universe.

On top of the exclusion criteria set out under 'Social, ethical and environmental aspects', the companies are assessed against additional SRI exclusion criteria which are available at www.kbc.be/investment-legal-documents > Exclusion policies for socially responsible investment funds.

The most important exclusion criteria relate on the one hand to controversial activities (tobacco, gambling, weapons, fur and speciality leather and adult entertainment). Companies involved in such controversial activities are excluded. On the other hand, the screening for controversies ensures that companies who seriously violate the basic principles

in terms of the environment, social aspects or good governance are excluded. This list is not exhaustive and can be adapted under the supervision of the Advisory Board.

Positive screening

Positive screening entails creating a universe of companies that operate in the water sector in a socially responsible manner. This includes, for example, the following business activities: companies active in the field of water and wastewater services, water purification technology and consultancies in the field of environmental management. Companies that focus at least 50% of their activities on this objective or that are market leaders in the relevant field(s) are eligible for the universe provided that these activities represent a significant part of their turnover.

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- developments as a result of which a company can no longer be regarded as socially responsible after purchase on the basis of the above criteria;
- corporate events, such as a merger of one company with another, where the merged company can no longer be considered a socially responsible company on the basis of the above criteria;
- incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets that do not have a socially responsible nature;
- a planned update of the socially responsible universe in which assets are no longer labelled as socially responsible but in which the fund manager chooses not to sell them immediately in the interest of the customer due to transaction charges.

In these cases, the fund manager will replace the assets concerned with socially responsible assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets which are not of a socially responsible nature, to the extent that no workable and comparable socially responsible alternative is available on the market for these derivatives. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a socially responsible nature.

The fund is actively managed without referring to any benchmark.

The socially responsible character is guaranteed by the aforementioned SRI screening.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	moderate	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in a theme which may include companies with a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies that operate in a socially responsible way within the water theme.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be/riskprofile.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Water - Classic Shares

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Selected strategy

The assets are invested in the shares of companies in all sectors worldwide that outperform their peers in managing the environmental impact of both their production process and their end product.

Within the above limits, the sub-fund invests in socially responsible assets. Socially Responsible Investing (SRI), has a positive impact on society, the environment and the world we live in. It is aligned with today's social and economic needs, without jeopardising the needs of future generations. The sub-fund promotes a combination of environmental and social characteristics, but does not have the objective of investing in economic activities that contribute to the achievement of environmental or social objectives. The companies in which it invests must follow good governance practices.

Specialised researchers of KBC Asset Management NV compile a universe of socially responsible companies. They are assisted by an advisory board (i.e. the 'SRI Advisory Board') comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the methodology and activities of the specialist researchers of KBC Asset Management NV. The secretariat of the advisory board is provided by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with a data supplier with expertise in SRI that provides data to the specialised researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The fund manager then strives to invest as much as possible in assets that form part of this universe. In order to create this socially responsible universe, the companies are subjected to a negative and positive screening procedure.

Negative screening

Negative screening entails specific criteria that exclude companies in advance from the socially responsible universe.

On top of the exclusion criteria set out under 'Social, ethical and environmental aspects', the companies are assessed against additional SRI exclusion criteria which are available at www.kbc.be/investment-legal-documents > Exclusion policies for socially responsible investment funds.

The most important exclusion criteria relate on the one hand to controversial activities (tobacco, gambling, weapons, fur and speciality leather and adult entertainment). Companies involved in such controversial activities are excluded. On the other hand, the screening for controversies ensures that companies who seriously violate the basic principles in terms of the environment, social aspects or good governance are excluded. This list is not exhaustive and can be adapted under the supervision of the Advisory Board.

Positive screening

Positive screening entails comparing a number of SRI criteria between companies within the same industry. Based on these criteria, companies belonging to the best-in-class of their group are included in the socially responsible universe.

The companies are selected based on a series of criteria which are tested as much as possible against objective measures, such as internationally recognised indicators. The advisory board supervises any changes to the list of criteria at all times. During the initial subscription period, the main criteria used are the following:

- respect for the environment (e.g., reducing greenhouse gas emissions);
- attention to society (e.g., employee working conditions) and
- corporate governance (e.g., independence and diversity of the board of directors).

This list is not exhaustive and may be changed under the supervision of the advisory board.

The sub-sector in which the company operates will determine which criteria are most relevant for this positive screening but good governance will always be taken into account.

Moreover, only those companies that perform best in terms of the environment will be selected.

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- developments as a result of which a company can no longer be regarded as socially responsible after purchase on the basis of the above criteria;
- corporate events, such as a merger of one company with another, where the merged company can no longer be considered a socially responsible company on the basis of the above criteria;
- incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets that do not have a socially responsible nature;
- a planned update of the socially responsible universe in which assets are no longer labelled as socially responsible but in which the fund manager chooses not to sell them immediately in the interest of the customer due to transaction charges.

In these cases, the fund manager will replace the assets concerned with socially responsible assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets which are not of a socially responsible nature to the extent that no workable and comparable socially responsible alternative is available on the market for these derivatives. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a socially responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI WORLD - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the socially responsible character of the portfolio. The socially responsible character is guaranteed by the aforementioned SRI screening.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3,00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be/riskprofile.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

World - Classic Shares

<i>Types of shares offered to the public</i>	<i>Currency for the calculation of the net asset value</i>	<i>ISIN code</i>	<i>The initial subscription period/day (unless the subscription period is closed early)</i>	<i>The first net asset value following the initial subscription period/day</i>	<i>Initial subscription price</i>
CAP (Capitalisation shares)	EUR	BE0133741752	27 March 1992 through 30 April 1992 before 2 pm CET Settlement for value: 4 May 1992	4 May 1992	10000 BEF
DIS (Distribution shares)	EUR	BE0177657500	27 March 1992 through 30 April 1992 before 2 pm CET Settlement for value: 4 May 1992	4 May 1992	10000 BEF

Recurrent fees and charges paid by the Bevek

Fee paid to the independent directors	see the 'Information concerning the Bevek - G. Fees and charges regarding the Bevek'
---------------------------------------	--

One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share

	<i>Subscription</i>	<i>Redemption</i>	<i>Switching between subfunds</i>
Trading fee	During the initial subscription period: 3.00% After the initial subscription period: 3.00%	-	A trading commission that is equal to the one applicable when buying into the new sub-fund
Administrative charges	-	-	-
Amount to cover the costs of the purchase/sale of assets	-	-	The appropriate amount covering these costs for the sub-funds concerned
Amount to discourage sales within one month of purchase	-	Max 5.00% for the sub-fund	Max 5.00% for the sub-fund
Stock market tax	see the 'Information concerning the Bevek - H. Tax treatment'		

Recurrent fees and charges paid by the sub-fund unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund. For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to max. 1.70% a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	-	-
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	see the 'Information concerning the Bevek - G. Fees and charges regarding the Bevek' for this non-structured sub-fund	
Annual tax	see the 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

World - Institutional Shares

This share class is reserved for institutional investors, as defined in Article 5 § 3 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, and requires a minimum subscription of 5000 EUR (both during as well as after the initial subscription period). The investor must have the status of institutional investor at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.
