

## KEY INVESTOR INFORMATION

*This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.*

## MF UBB Global Child Fund

**ISIN BG9000004168**

**UIC: 176999341**

The Fund's units are denominated in Bulgarian lev and are registered with the Central Depository.

The Fund is managed through "KBC Asset Management NV - branch" – Bulgaria, UIC 205422541, by the foreign Management Company "KBC Asset Management NV" - Belgium, № 0469.444.267 (universal successor of "UBB Asset Management" EAD)

The Fund originates in the Republic of Bulgaria and is subject to regulation by the Financial Supervision Commission.

## OBJECTIVES AND INVESTMENT POLICY

- The Fund's main financial objective is to ensure that unit-holders increase the value of their investment by realising primarily capital gains (the difference resulting from the sale-purchase of financial instruments) and, to a lesser extent, dividend and interest income, which may be achieved at moderate to high risk and high liquidity of investments.
- The Fund's resources are mainly invested in equity securities of companies whose activities are oriented towards the production of products and services related to the raising and care of children and are admitted to trading on regulated markets in the country and abroad, up to 95%, to a lesser extent - in debt securities, up to 50%, in money market securities and instruments, up to 10%. The Fund should have liquidity, which mainly consists of deposits with banks - not less than 5% of the total assets.
- The Fund does not distribute dividends. All earnings are reinvested thus increasing the value of the units held by investors in the Fund.
- Appropriate investment methods to protect the portfolio from different types of risk - market and credit risk - can be applied by entering into derivative transactions, for the achievement of the Fund's fundamental objectives and the management of risk.
- The Fund sells and redeems its units through the branches of the distributor - United Bulgarian Bank AD within their business hours with customers.
- The Fund is intended for risk-inclined investors seeking higher returns on their investments and accepting the possibility of adverse changes in the Fund's unit prices
- The Fund is actively managed without reference to a benchmark.
- Recommendation: it is possible that the Fund may not be appropriate for investors who plan to withdraw their money within five years

## RISK AND REWARD PROFILE

### Synthetic indicator

The risk indicator determines the type of fund according to the share in the scheme of the equity investment (risk), debt (low risk) and money market instruments (risk-free) and reflects the market risk of depreciation of the units. The investment structure that the Fund seeks to maintain by investing up to 95% of its assets in risk securities (shares, rights) and up to 50% of its assets in bonds predetermines a level of risk above the average, or 5th category on the synthetic indicator scale. The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile. The specified risk category and the reward may be subject to change and the Fund's categorisation may shift over time. The lowest category does not mean a risk-free investment.

Other risks that have an impact on the Fund but are not covered by the synthetic indicator: (a) Interest rate risk associated with a decrease in the value of the investment due to a change in the level of interest rates; b) Credit risk associated with the risk that the bond issuer, respectively the person providing the collateral, can not fulfil its obligations to repay in due time the principal and/or the interest due; c) Liquidity risk associated with the risk that, under certain conditions, it makes it difficult or impossible to sell financial instruments held by the Fund at an acceptable price, as well as the risk that, under certain conditions, the units of the Fund may not be redeemed. The liquidity of the units of the Fund may be limited by temporary suspension of the redemption in the cases described in paragraph 2.10.5 of the Prospectus, which is available at [www.ubbam.bg](http://www.ubbam.bg). d) Additional risks of using derivatives - additional management risk, leverage risk, risk of erroneous valuation of a derivative, and there is no certainty that the application of such investment methods to protect the portfolio will be successful. Further information on risks is contained in paragraph 2.15 of the Prospectus, which is available at [www.ubbam.bg](http://www.ubbam.bg).

## CHARGES

1. One-off charges taken before or after the investment	
<b>Entry charges*</b>	<ul style="list-style-type: none"> <li>for orders up to BGN 25,000 (incl.) - 2.00% of the NAV per unit;</li> <li>for orders from BGN 25,000.01 up to BGN 100,000 (incl.) - 1.50% of the NAV per unit;</li> <li>for orders from BGN 100,000.01 up to BGN 200,000 (incl.) – 1.00% of the NAV per unit;</li> <li>for orders over BGN 200,000 – 0.00%</li> </ul>
<b>Exit charge</b>	0.00%
<p>*When a contract for systemic investment is concluded, entry charges apply only in respect of the first instalment under the contract. The issue value for each subsequent instalment is without entry charges.</p> <p><i>This is the maximum amount that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. Investors can find out the actual entry and exit charges from their financial advisor, distributor, at the point of sale or on the website of the branch of Management Company <a href="http://www.ubbam@ubb.bg">www.ubbam@ubb.bg</a>.</i></p>	
2. Ongoing charges taken from the Fund over a year	
<b>Ongoing charges</b>	3.42%
<p><i>"Ongoing charges" are expenses calculated on the basis of the year-end of 2020, indirectly borne by all investors in the Fund, and are % of the average annual net asset value of the Fund for 2020. Ongoing charges may vary from year to year. They include the fee of the MC, which is 2.50% of the average annual net asset value of the Fund.</i></p>	
3. Charges taken by the Fund under certain conditions	
<b>Performance fee</b>	0.00%

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing its units. These charges reduce the growth potential of the investment, as they could have an impact on the reward. Ongoing charges include fee of the Management Company, the depository bank, commissions of the investment intermediaries, costs related to the execution of the Fund portfolio transactions, fees of auditors, the Central Depository, the Financial Supervision Commission and others. Further information on the charges is contained in paragraphs 2.16.1 and 7.1 of the Fund's prospectus, available at [www.ubbam.bg](http://www.ubbam.bg).

## PAST PERFORMANCE

The information shows the percentage change in the Net Asset Value per Unit (NAVU) at the beginning and the end of the period. The NAVU is calculated in Bulgarian lev. The calculation of historical reward is based on the net asset value of the Fund, including all annual costs, excluding entry and exit charges. Income from entry and exit charges is transferred to the distributor. The chart of reward in previous years has a limited value as a guide to future performance.

## PRACTICAL INFORMATION

Depository Bank: Eurobank Bulgaria AD, UIC 000694749.
